Garrod Hydraulics to Rebuild Cylinders for MCG

EnCORE, a rebuild, repair, remanufacture, and exchange program available to Manitowoc Crane Group customers through Manitowoc Crane CARE, now includes an option for having hydraulic cylinders remanufactured. Through a new partnership with Garrod Hydraulics, York, Pa., 100% of EnCORE cylinder remanufacturing is currently done by Garrod.

The service will be available to MCG crane owners through local Manitowoc CraneCARE distributors. Benefits include maintaining the machine's integrity by repairing it with certified parts, a quick turn around time, a competitive warranty, and off-the-shelf components to reduce down time.

Having partnered with Manitowoc Crane

CARE on smaller projects in the past, Garrod Hydraulics has the facility capacity to handle massive hydraulic cylinders, such as those used on Manitowoc Crane Group products.

EnCORE is one of five key disciplines in the Manitowoc Crane CARE program, which also includes Parts; Service and Technical Support; Technical Publications; and Training. ■
